www.linkedin.com/in/sunny14raj

Summary

Enthusiastic Master of Computer Applications (MCA) student with a strong foundation in Java development, concurrent programming, object-oriented design, and data structures. Proven ability to architect multi-threaded applications, priority-based scheduling engines, and real-time networking systems. Seeking a Software Engineering Intern or Java Developer role to apply software architecture skills and solve complex real-world problems.

Experience

Concurrent Production Line Scheduler & Simulator | Greater Noida, India

Java & Multi-threading Project | 2026

- Designed and built an automated production line simulation engine in Java to dynamically schedule and execute tasks based on real-time priority and machine availability.
- Implemented multi-threading using Java's Runnable interface and Thread.join() to execute machine operations concurrently while maintaining thread synchronization.
- Leveraged object-oriented design patterns (Abstraction, Polymorphism, Encapsulation) using abstract Machine classes extended by specialized implementations (CNCMachine, HeavyDutyMachine).
- Integrated task queueing via LinkedList queues, capacity boundary exception handling, and persistent execution logging using Java File I/O (PrintWriter).

Java Socket Chat Application | Greater Noida, India Independent

Developer | 2026

- Built a real-time, desktop messaging application in Java using Swing for the user interface and TCP/IP Sockets for network communication.
- Designed a responsive graphical interface (GUI) featuring custom chat bubbles, a scrollable message history using JScrollPane, and automatic timestamp formatting.
- Applied clean Object-Oriented Programming (OOP) principles and managed project version control using Git and GitHub.

Education

Noida Institute of Engineering and Technology (NIET) | Greater Noida, India

☐ Master of Computer Applications (MCA) | Expected 2027

Maulana Mazharul Haque Arabic and Persian University | Patna, India

- Bachelor of Computer Applications (BCA) | Completed 2025

Raj Narayan College | Hajipur, Bihar, India

- Intermediate (10+2) | Completed 2021

Additional

- Technical Skills: Java, Object-Oriented Programming (OOP), Multi-threading & Concurrency, Basic Data Structures, Lambda Expressions, File I/O, Swing/GUI, TCP/IP Sockets, Git, GitHub, VS Code.
- Languages: English, Hindi.
